

Equipment and licences in one register.

Every company asset — from laptops and phones to software licences.

The module records every asset, links it to the employee using it, and tracks warranties, contracts and cost. The data lives in Dataverse and surfaces in model-driven views and live dashboards.

THE LIFECYCLE

01

Record

Purchase and delivery: serial number, supplier, cost, warranty and status.

02

Assign

Linked to employee, department and cost centre, with hand-over and return history.

03

Track

Warranty, maintenance and leasing expiry, with automatic notifications.

04

Refresh or retire

Equipment age, replacement planning and depreciation per category.

WHAT YOU TRACK

Asset register

Laptops, desktops, mobiles, monitors, vehicles and site equipment in one register.

Warranties & contracts

Alerts before warranty, maintenance or leasing expiry via Power Automate.

Cost & depreciation

Acquisition cost, age and refresh planning per equipment category.

Assignment to staff

Who has what, since when, in which department and against which cost centre.

Software licences

Microsoft 365, Autodesk, Adobe and other vendors, per user and per product.

Requests & incidents

New-equipment requests and fault reports with approvals and SLAs.

WHERE YOU SEE IT

→ Model-driven views with filters

→ IT dashboard on live data

→ Export to Excel

→ Power BI reporting
