

PORTALS & READY-MADE SOLUTIONS

Ready-made apps at zero infrastructure cost.

Built with Power Apps Canvas and SharePoint storage — on the Microsoft 365 licences you already own.

No new infrastructure, no new database and no extra storage cost. The apps are delivered ready and then adapted to your own processes and approval flows.

THE APPS

01

Power Pages Portals

Portals for customers and partners: self-service requests, role-based access and live Dataverse data.

02

Expense Reports

Submit and approve expenses: photo receipts, Power Automate approval flows, SharePoint archiving.

03

Leave Management

Leave requests, approvals and balances — part of BVC Workplace, alongside desk booking.

04

Performance Management

Goals and appraisals: review cycles, role-specific forms and progress reports.

WHY IT WORKS

Zero infrastructure cost

Uses the Microsoft 365 licences you already hold, with no extra storage cost.

Approval flows

Power Automate flows shaped around your org chart and thresholds.

Your data

Everything stays in your tenant, on SharePoint or Dataverse, under your access rules.

Fast delivery

A ready base that gets configured, instead of development from scratch.

Mobile from the start

Canvas apps that work on phone and tablet, with photo capture and offline use.

Extensible

When the time comes we move to Dataverse and Dynamics 365 without rebuilding.

COMMON EXTENSIONS

- Payroll integration
- Ticket management
- Asset Management
- Power BI dashboards
